

MEGHANA BALAPPA UPPAR

Data Analyst | SQL · Python · Power BI · Machine Learning · AI-Augmented Analytics

meghanabu01@gmail.com • +91 7019792980 • [linkedin.com/in/meghana-uppar](https://www.linkedin.com/in/meghana-uppar) • github.com/Meghana-b-u • Portfolio • Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Results-driven Data Analyst with experience analyzing **1M+ row datasets** to surface revenue risks and growth opportunities. Delivered analyses identifying **2.1M GBP in at-risk customer value** and **21% of SKUs driving 80% of 19.3M GBP revenue**. Proficient across the full analytics stack: SQL, Python, RFM segmentation, ML forecasting, and Power BI — delivering end-to-end projects from data ingestion to stakeholder dashboard as a solo contributor. Leverages AI tools (ChatGPT, GitHub Copilot, Julius AI; Be10x certified) to accelerate analysis and insight delivery.

TECHNICAL SKILLS

Languages & Query: Python (pandas, NumPy, scikit-learn, Prophet, matplotlib, seaborn), SQL (MySQL, SQLite — JOINS, CTEs, Window Functions), DAX

BI & Visualization: Power BI (KPI Cards, Slicers, DAX Measures, Power Query), Excel (Advanced), Jupyter Notebook, Google Colab

Analytics: EDA, RFM Segmentation, Pareto Analysis, KPI Design, ML Forecasting (Prophet), Classification Modeling, Churn Analysis, Statistical Analysis, ETL Pipeline, Business Intelligence

AI Tools: ChatGPT, Claude AI, GitHub Copilot, Julius AI, Perplexity AI, Notion AI

PROFESSIONAL EXPERIENCE

Data Analytics Intern | **Unlox Academy**

Bengaluru, Karnataka | Feb 2026 – May 2026

- **Surfaced revenue leakage patterns** via 15+ advanced SQL queries (JOINS, CTEs, Window Functions) on large transactional datasets — insights directly adopted into retention strategy.
- **Cut data prep time approx. 60%** by automating cleaning of **1M+ row datasets** with Python (pandas) — missing values, duplicates, and outliers resolved end-to-end.
- **Eliminated days-long reporting lag** by building Power BI dashboards with 10+ DAX measures and dynamic slicers — stakeholders self-serve revenue and segment insights in real time.
- **Quantified 2.1M GBP at-risk value** via RFM segmentation of 5,878 customers into Champions, Loyalists, and At-Risk tiers with tailored retention strategies per segment.

KEY PROJECTS

E-Commerce Sales Intelligence Platform | *Python · SQL · Power BI · Prophet · RFM · scikit-learn*

[GitHub](#) ↑

- **Built 9-stage end-to-end ETL pipeline** on **1,067,371 UK retail transactions** — ingestion, SQL analysis, EDA, RFM segmentation, Power BI dashboard, and Prophet ML forecasting.
- **Exposed 15.4M GBP concentration risk:** Pareto analysis found 21% of SKUs (1,040 products) drive 80% of 19.3M GBP revenue — recommended priority stock protection for these SKUs.
- **Unlocked 2.1M GBP win-back opportunity:** 880 At-Risk customers flagged; 774 Champions drive 55% of revenue — segment playbooks built for immediate campaign execution.
- **Forecast 2x November revenue spike** with Prophet — proposed October inventory ramp-up to capture seasonal uplift and eliminate stockout risk.

Customer Churn Prediction Model | *Python · pandas · seaborn · scikit-learn · Classification*

[GitHub](#) ↑

- **Deployed churn probability scoring** on every customer using a scikit-learn classifier — enabling targeted proactive outreach before cancellation occurs.
- **Identified top 3 churn drivers** (contract type, monthly charges, tenure) from 20+ features — delivered segment-level retention playbooks per risk tier for direct business action.

EDUCATION

B.E. Computer Science Engineering | Dr. T. Thimmaiah Institute of Technology, Kolar Gold Fields, Karnataka | **CGPA: 8.94/10**

Aug 2022 – Jun 2026
